

# Selecting Behaviors

Residential EE Behaviors	I	P
1. Switch to Green Power	8700	
2. Install 10 CFLs	700	
3. Install 3 Low-Flow Showerheads	650	
4. Wash Clothes in Cold Water	450	
5. Shorter Showers (6 to 4 minutes)	600	
6. Turn off Second Fridge (most of the time)	570	
7. Switch off Standby Power	280	

**Instructions:** 1) On a separate piece of paper each member of your table rates the probability of home owners engaging in the seven behaviors; 2) Average your tables' probability ratings for each behavior and fill them into the table above; and 3) Use the probability averages your table calculated, and the supplied impacts, to chart the seven behaviors. Note: The impact values are based upon a state/province in which the majority of electricity comes from burning coal.
